CHANGE OF NAME.

The stockholders of the corporation heretofore known as

THE YALE LOCK MFG. CO.,

at their annual meeting, held April 19th, 1883, voted to change the title of the corporation to

THE YALE & TOWNE MFG. CO.,

by which name it will hereafter be known, and to which all communications should be addressed

Subordinate organizations have also been effected, entitled

THE YALE LOCK MFG. Co.,

THE WESTON CRANE Co.,

THE EMERY SCALE Co.,

all of which are owned by and operated under the name of the parent Company.

ANNOUNCEMENT.

THIS LITTLE BOOK presents an epitomized list of our various manufactures.

Our oldest specialty is FINE LOCKS, of which we make more than four hundred sizes and styles, adapted to almost every possible use. Our other Lock specialties are Bank Locks, Decorative Bronze House Trimmings and Post Office Equipments. In addition to the above, we manufacture Weston's Differential Pulley Blocks, Crabs, Winches, and Hoists, Jib, Pillar and Traveling Cranes. Also, Emery's Scales, Gauges and Testing Machines.

In all our lines we confine ourselves to Good Work only, and we make no inferior grades.

CATALOGUES.

Our *large* Catalogue, an expensive and fully illustrated quarto book, is furnished to any responsible Hardware House, so that the latter should always be able to show it to customers, and to supply any of our goods. We beg to be informed in any case where this is refused.

 CORRESPONDENCE SOLICITED from parties needing any of our specialties, *of each of which we have separate Catalogues.*

CUSTOMERS

Who cannot obtain our goods from their Hardware dealers, are requested to apply directly to us.

Any of our goods (which can be sent by mail) will be forwarded, *charges paid*, to any address in the United States, on receipt by us of the catalogue price. A cash discount allowed on orders for a number of locks.

Our name is plainly stamped on every article. See to this before purchasing.

THE YALE LOCK MFG. CO.

This department of the business, as its name implies, comprehends the manufacture of locks, adapted for every use and in great variety of sizes and styles.

The line of locks comprises two classes, viz: the well-known "YALE" locks, intended for all purposes where SECURITY is desired, operated by their characteristic keys, and the "STANDARD" locks of the usual "tumbler" variety, but thoroughly well made and with abundant capacity for changes.

THE "YALE" LOCKS

As now made, are provided with keys similar to the original well-known flat plate keys, altered only by having the blade, or portion which enters the lock, corrugated in longitudinal lines, as shown in the cut, while the key hole has a sinuous cross section corresponding to that of the key.

HALF SIZE OF KEY FOR YALE LOCKS.

By means apparently so simple, improvements of the utmost importance have been effected

both in the lock and its key, and as a result, the NEW YALE Lock is as much better than the original YALE Lock, as the latter is conceded to be superior to other locks.

In imitation of the original YALE Locks, many cheap and insecure locks have been furnished with flat keys, and palmed off at high prices by calling them "Yale" Locks; but the genuine YALE Locks (with name of Company plainly stamped on them,) wherever known, are the recognized standard of excellence for

*SAFETY,
NON-INTERCHANGING OF
KEYS,
GOOD WORKMANSHIP.*

"YALE" RIM STORE LOCK.

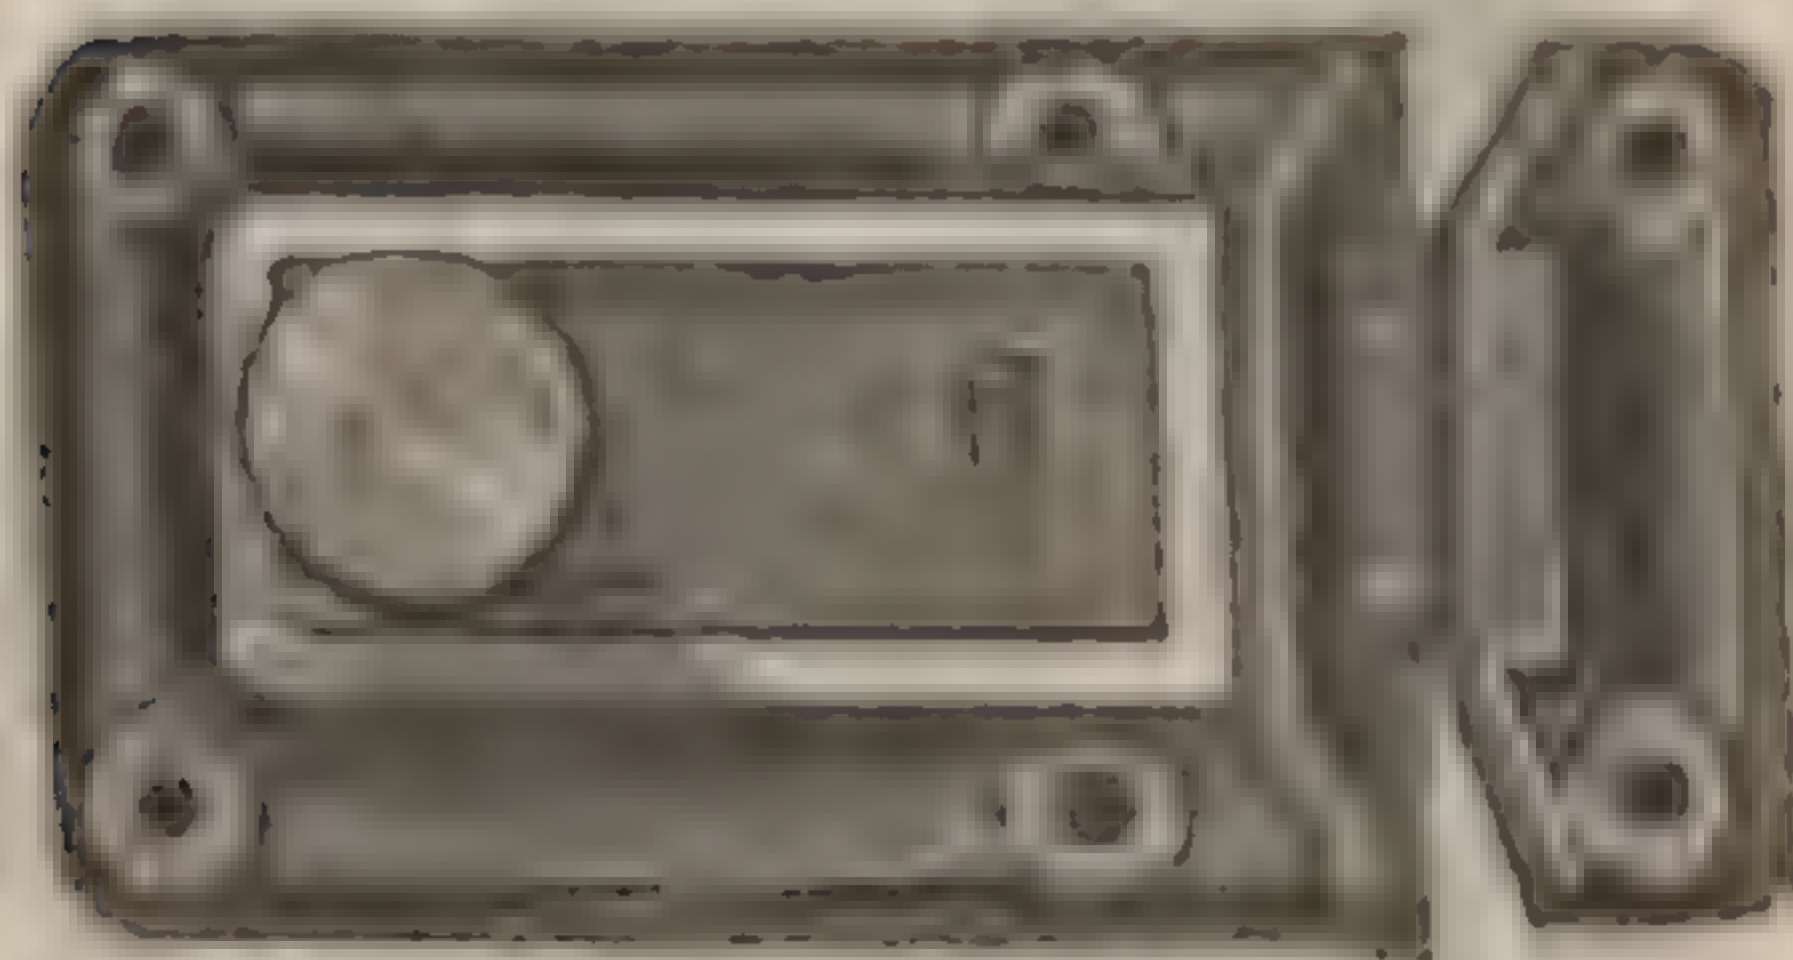

A heavy dead lock for Store doors, etc. Packed complete with all fittings and screws.

PRICE, EACH.

No. 4,	3x5 inches,	4 keys...	\$5.50
No. 12,	2½x4 " 3 "	... 4.25	

SEE PAGE 7.

"YALE" RIM NIGHT LATCH.

A self-closing *Spring Lock*, for Residences, Offices, Club Rooms, etc. Size, $3\frac{1}{2} \times 2\frac{1}{2}$. Packed complete, with screws, etc.

PRICE, EACH.

No. 42, Spring lock, 1 key...	...
No. 38, Dead " " " "	0.75

SEE PAGE 7.

CLUB ROOM LOCKS.

We furnish for Clubs locks with *any number of keys* (we have supplied as many as 1,500 keys for one lock).

We also make locks especially adapted to

BOAT HOUSES,

BATH HOUSES,

IRMORIES, ETC.

And *all* of our locks are particularly applicable where many locks are used together and it is important that their keys *should not interchange.*

"YALE" MORTISE NIGHT LATCH

A self-closing *Spring Lock* for Residences, Offices, Clubs, etc. Packed complete, with all fittings and screws. Size, $3\frac{1}{4} \times 3\frac{1}{2}$ inches, 3 keys each.

PRICE, EACH.

No. 64, Plated Escutcheon... \$3.75
No. 66, Brass Escutcheon... 3.90

"YALE" MORTISE DEAD LOCKS.

For Store Doors, Closets, and all places where *Spring* locks are *not* wanted. A variety of sizes and styles. Packed complete, 3 keys each.

PRICE, EACH.

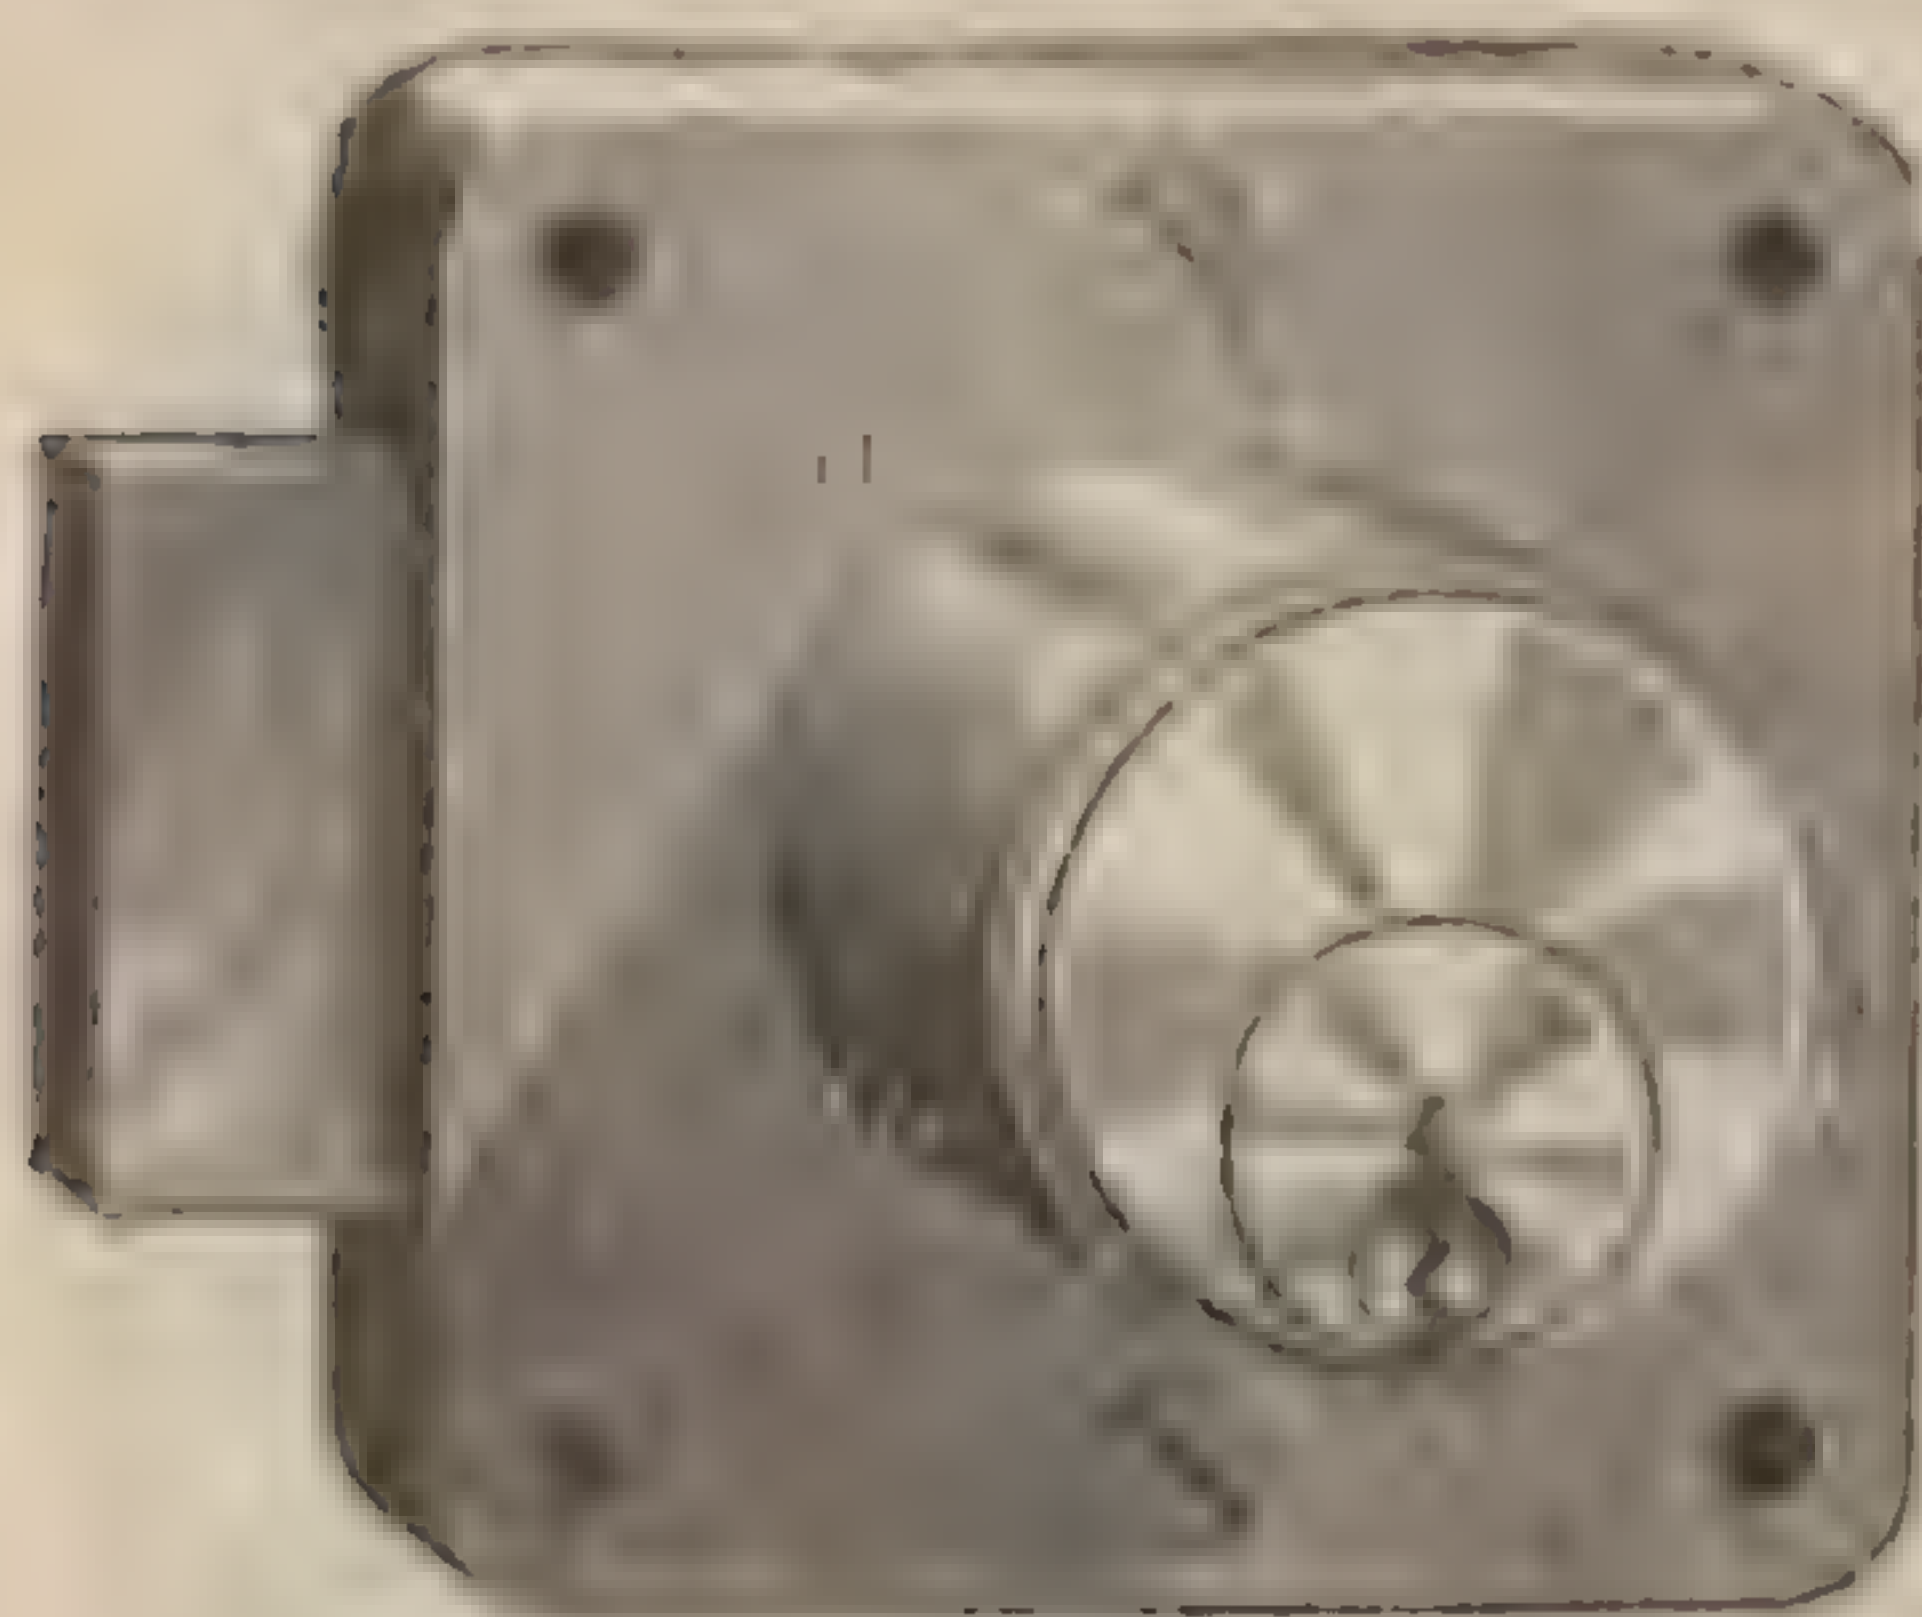

No. 304, $4\frac{1}{2} \times 3\frac{5}{8}$ inches.....	\$5.00
No. 344, $2\frac{1}{2} \times 3\frac{5}{8}$ "	3.00

FRONT DOOR SETS.

We make a specialty of large fine Locks for Front and Vestibule Doors, complete with Knobs, Escutcheons, and other trimmings, in great variety of finish, including Plain, Ornamental and Hammered Bronze, Nickel, Silver Plate, etc.

In our Front Door Locks, a *single key* gives the master of the house control of both bolts *at all times.*

"YALE" CUPBOARD LOCK.

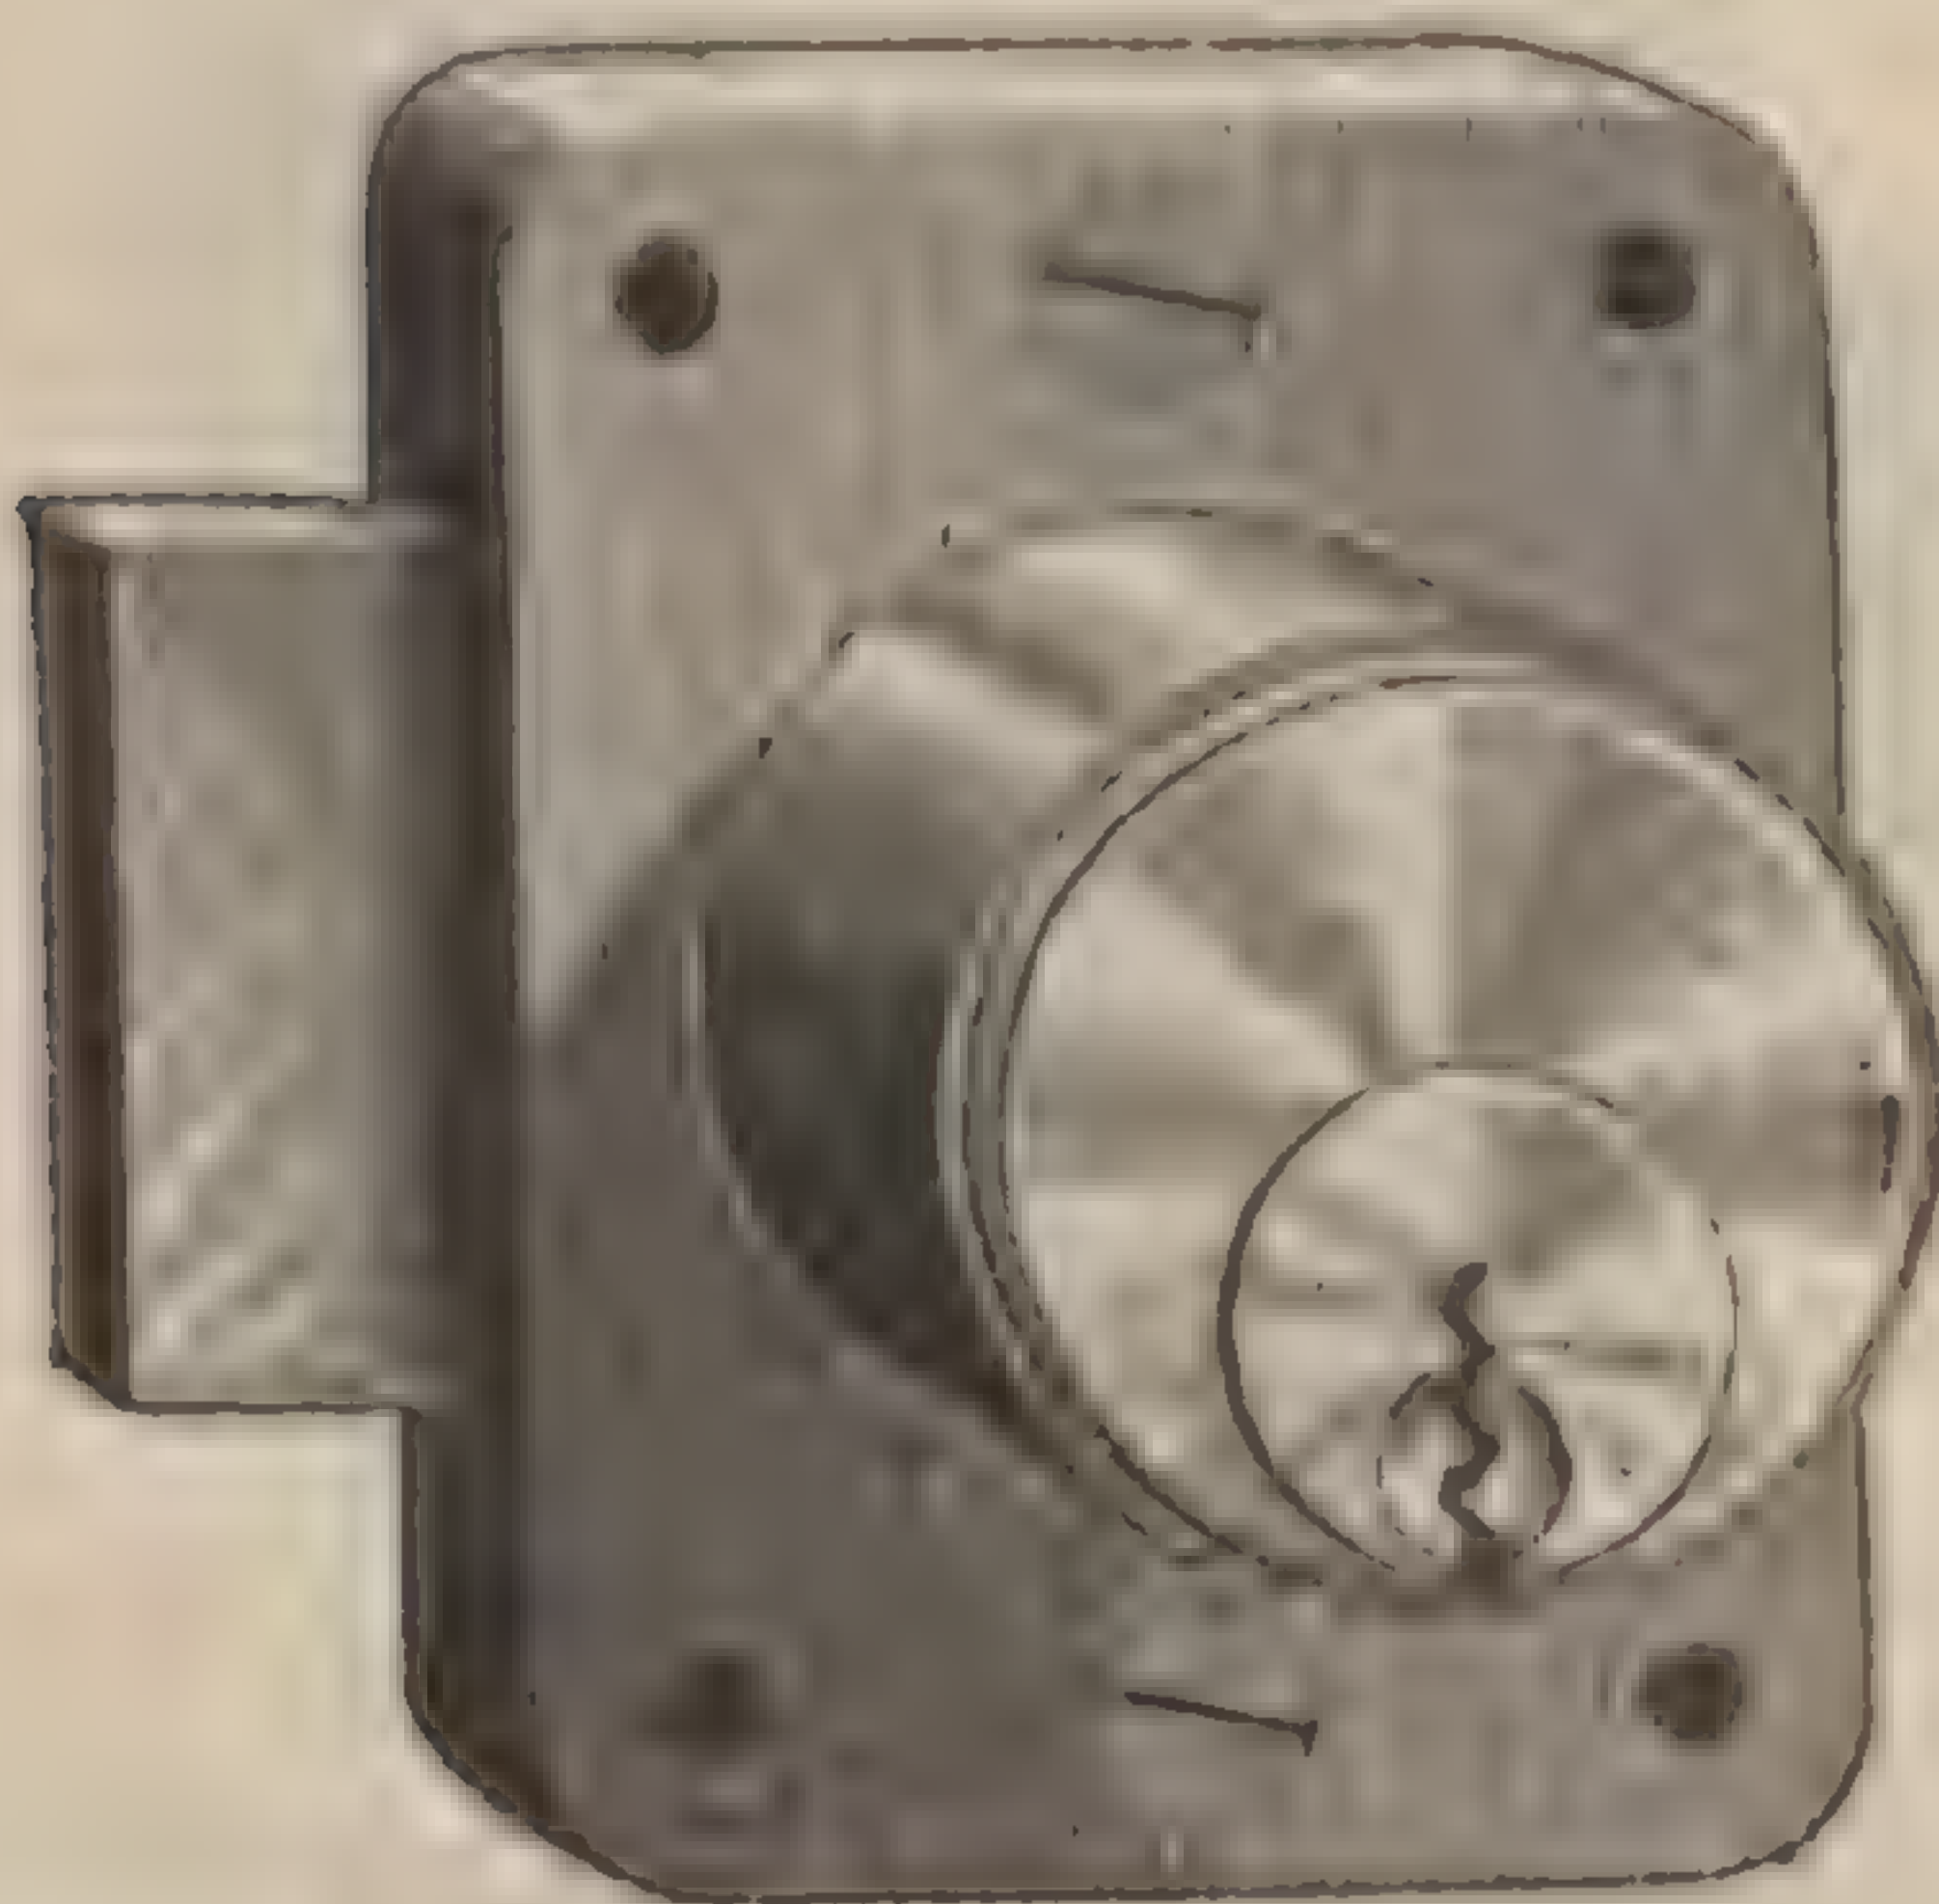

Finished brass dead locks, suitable for Book-cases, Wine-closets, Buffets, etc., etc. Size, 3 1/2 inches. In ordering, specify *Thickness of door*

PRICE, EACH.

No. 500, Plated No. 500	\$1.00
No. 501, Brass	1.50

SEE PAGE 7.

"YALE" CUPBOARD LOCK.

Narrow patterns, for glass doors etc. Specify thickness of door and "hand." Size, 2x1½ inches.

PRICE, EACH.

No. 511. Dead Lock.....	\$1 25
No. 511S. Spring ".....	1 50

SEE PAGE 7.

"YALE" CHEST LOCK.

Heavy brass locks for Carpenters', Mechanics', Carpet, Blanket, and Silver-Plate Chests. Size, 5x2 3/4 inches.

Specify thickness of wood on which lock is to go.

PRICE, EACH.

No. 520, Plated Nose.....	\$2 35
No. 521, Brass ".....	2 45

SEE PAGE 7.

"YALE" DRAWER LOCK.

Fine brass locks for drawers of all kinds, including Cash and Desk drawers. A large variety of sizes. Size $2\frac{1}{4}$ x $1\frac{1}{2}$ inches.

Specify thickness of wood.

PRICE, EACH.

No. 360, Plated Nickel.....	\$1.00
No. 361, Brass.....	1.00

SEE PAGE 7.

THE "STANDARD" LOCKS

Comprise a line of mortise locks equal in materials and workmanship to the "Yale" locks, but of less expensive construction, thus adapting them to all uses where *great* security is not essential.

All of the "Standard" door locks have nickel-plated steel keys, of the form and marks shown in the cut, and are provided with iron bolts and steel tumblers.

The line comprises every style required for the complete equipment of any house, such as Knob Latches, Dead Locks, Knob Locks, Sliding Door Locks and Latches, Front Door Locks, Vestibule Latches, Night Latches, etc., etc.

It includes also Cabinet Locks in great variety, and Sub-Treasury and Double Safe Deposit Locks, operated with flat steel keys.

Also, six sizes (1/4 inch to 3 1/2 inches), of finely finished

CASE THICKEN SPRING PADLOCKS,
made of bronze and brass
throughout. These padlocks will
not rust under any exposure, and
for solidity and strength are un-
equaled.

In this Department is also in-
cluded the manufacture of Real
Bronze House Trimmings, plain,
ornamental and "hammered,"
"Yale" Post Office Lock boxes,
provided with the "Yale" lock
and keys, Prison Locks in various
styles, "Yale" Combination Bank
and Safe Locks, and the "Yale"
Time Lock.

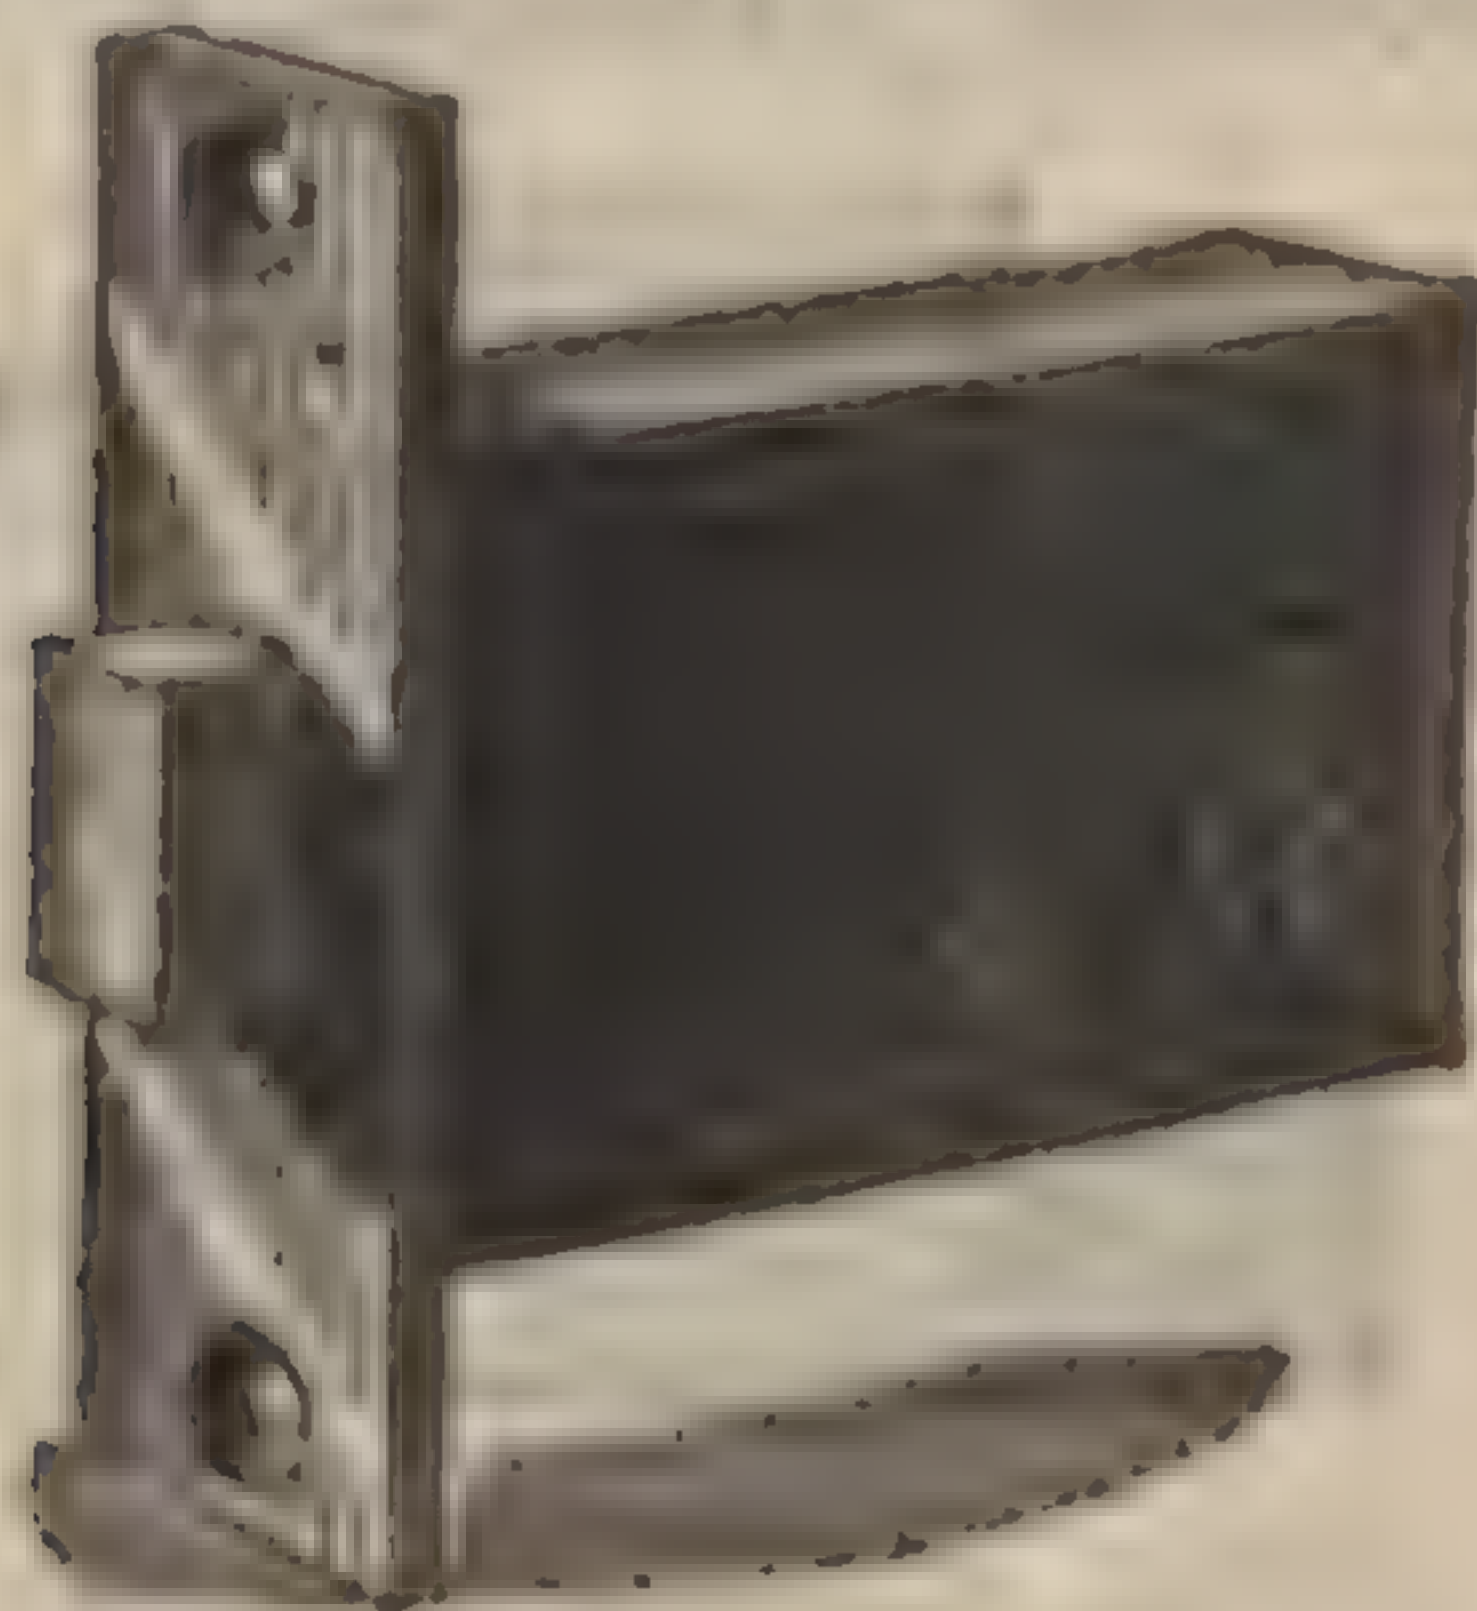

" STANDARD " KNOB LOCKS.

PRICE, EACH

No. 1400,	5	8 3/4	inches	75

SEE PAGE 7.

THE BEST OUTFIT OF LOCKS

For dwellings and residences of all classes consists of :

THE "YALE" LOCKS

for the front and other outside doors, for store rooms, linen closets, wine cellars, etc., etc., and

THE "STANDARD" LOCKS

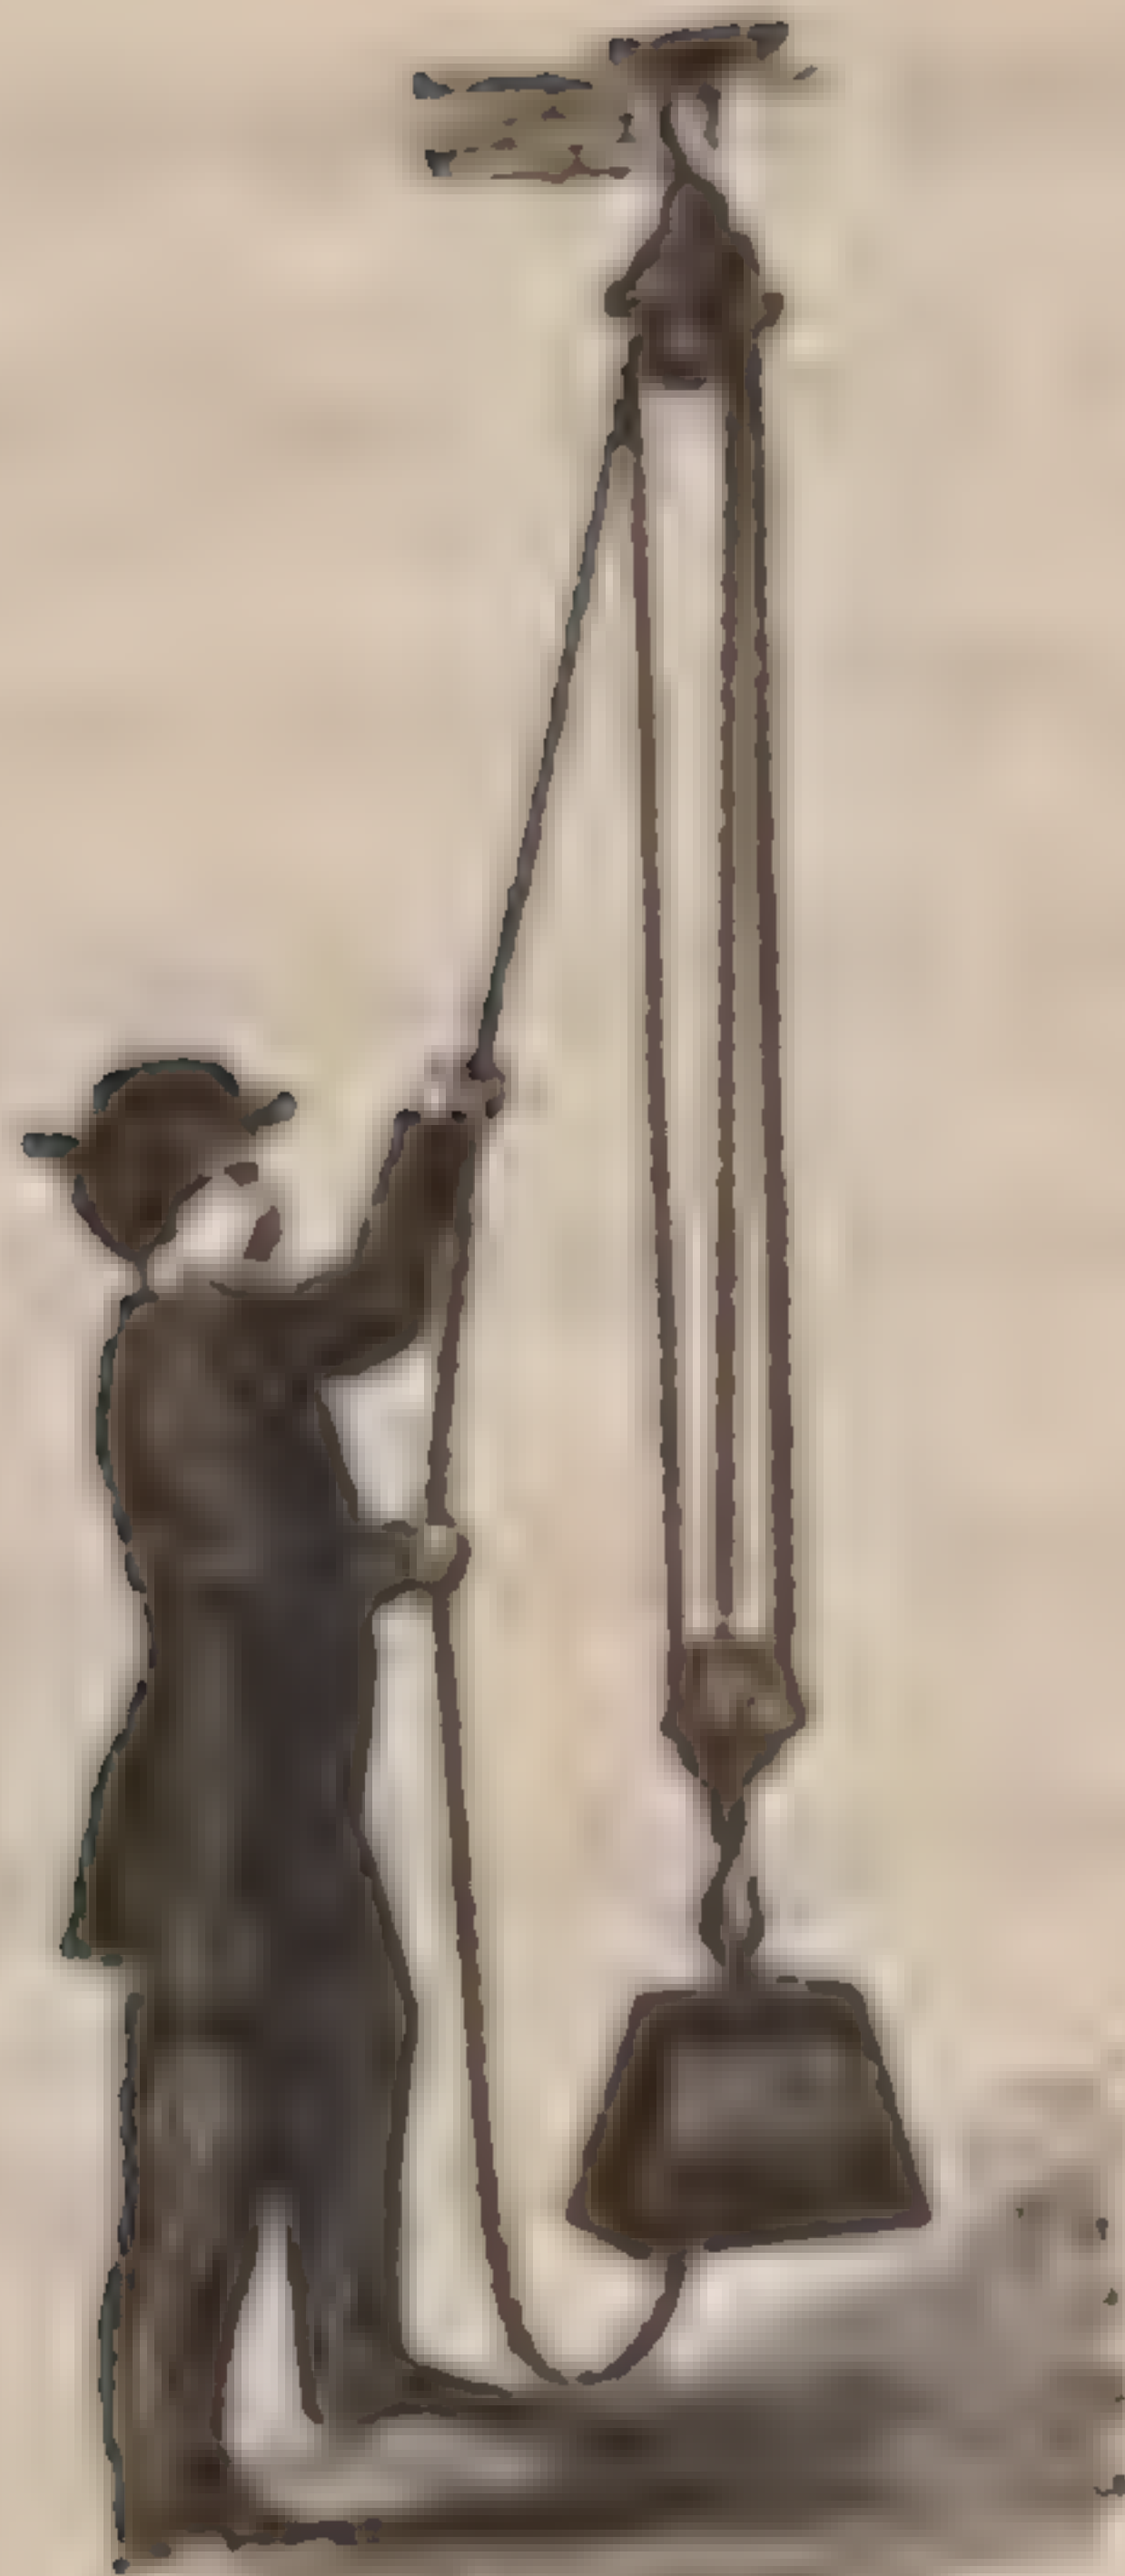

for all the inside communicating doors, closets, halls, etc., etc.

Special catalogues and price lists of our various lock products will be promptly furnished to those desiring them.

THE WESTON CRANE CO.

LIGHT HOISTS.

The leading specialty among our Portable Hoists is the Weston Differential Pulley Block. This Block is known throughout the world as the standard for power, safety, simplicity, and durability. They are of capacities from $\frac{1}{2}$ to 10 tons, and one man can lift from 1,000 to 5,000 lbs., according to size of block.

WESTON'S PULLEY BLOCK.

We may next mention WESTON'S PATENT CRABS and WINCHES in which *safety to the person and to the load* is completely obtained. The load is always self-sustained the patent brake being continuously self-applied by the pull of the load, so that the handles may at any time be "let go" suddenly without the weight "running down."

WESTON'S PATENT DOUBLE-LIFT Hoist is another of our specialties. It consists of a chain, with hook on each end, passing over a sheave which can be rotated by the hand rope and wheel, and provided with Weston's Patent Brake.

If the rope is let go, the load will remain suspended—it *can never "run down."* As one hook ascends, the other descends, and is thus ready for the next load.

It is a *Better, Safer, Simpler and Cheaper Machine* than the old "rope-wheel and drum" so commonly used.

The Differential Pulley Blocks have been applied to a system OVERHEAD TRANSFER TRACKS with great success.

This method of handling merchandise is capable of application to a wide range of uses, but its adoption has heretofore been restricted by reason of the cost and complication of the machinery required. Our inventions and improvements have removed this obstacle, and have made the system available for a great variety of purposes.

Illustrated Catalogues and Price Lists of Light Hoisting Machinery will be furnished on application.

CRANES.

The Company also manufactures Cranes, embodying the patented devices of THOMAS A. WESTON (the inventor of the Differential Pulley Block) and others, including Traveling, Jib, Pillar and Special Cranes, for operation by hand or power, and of any capacity.

The salient features of these Cranes are greater safety, economy, ease of handling, and general convenience than any heretofore made.

A principle underlying all of the various types, and which is of the highest importance, is *absolute safety*.

Every machine is so constructed that the load is always self-sustained, and cannot "run down."

Simplicity is a prominent feature throughout, the results being accomplished with the fewest parts and least complication possible.

An illustrated and descriptive Catalogue of the various types of Cranes made by us will be mailed on application, and further information regarding them, with Specifications and Tenders, will be promptly furnished on receipt of type, capacity, dimensions, etc., of the Cranes desired.

THE EMERY SCALE CO.

The business of this department includes the manufacture, under the Emery patents, of

TESTING MACHINES, PRESSURE
GAUGES, AND SCALES.

Operations were commenced by the building of 75-ton Hydraulic Testing Machines arranged for making tests of tension, compression and transverse loads. Designs are in progress for machines of other sizes, both larger and smaller, and also for special machines for Torsional

Tests. These machines are similar in their principal details to the 400-ton Emery Testing Machine in the U. S. Arsenal at Watertown, but are of the upright instead of the horizontal type.

The manufacture of SCALES will embrace all varieties—from the heaviest railroad-track scales to delicate Chemists' Scales.

In the line of PRESSURE GAUGES there will be included the ordinary sizes—from 6 to 12 inch—for Steam and Water, and also large Gauges for the measuring

of fluid pressures of any kind and of high tension.

The development of all these several types of machines marks a new departure in the art of weighing mechanism, and makes possible the construction of weighing machines possessing a sensitiveness, accuracy, and durability never before attained.

The many novel and beautiful devices embodied in these various machines are too numerous to be further described here, and can be best appreciated from an inspection of the machines, which those interested in them are invited to make.
